

Lingotek Inside Connectors

Lingotek's Translation Network is the only cloud-based solution to connect all of your global content in one place, giving you the power to manage your brand worldwide. Our industry-leading technology pairs with the best enterprise applications and tech-enabled language services to continuously push dynamic multilingual content to your global markets.

Lingotek Inside Connectors offer out-of-the-box integration with all of the most popular web applications. Our open, RESTful API makes these seamless integrations possible. The connectors provide access to Lingotek's industry-leading translation management system (TMS) with tools like easy-to-use workflows, in-context workbench, linguistic quality evaluation, and intelligence.

The Lingotek connectors can continuously translate and publish dynamic, multilingual content to your application within a single, uninterrupted workflow. As a result, translations are accelerated and the localization of global content becomes faster and more streamlined.

How It Works

Lingotek - Inside Connectors give enterprises the ability to translate content

without ever leaving the authoring interface or native environment. They are easy and intuitive to use. They support machine, community, and professional translation in 250+ languages. Users can choose a translation workflow to suit every content type, budget, and quality need.

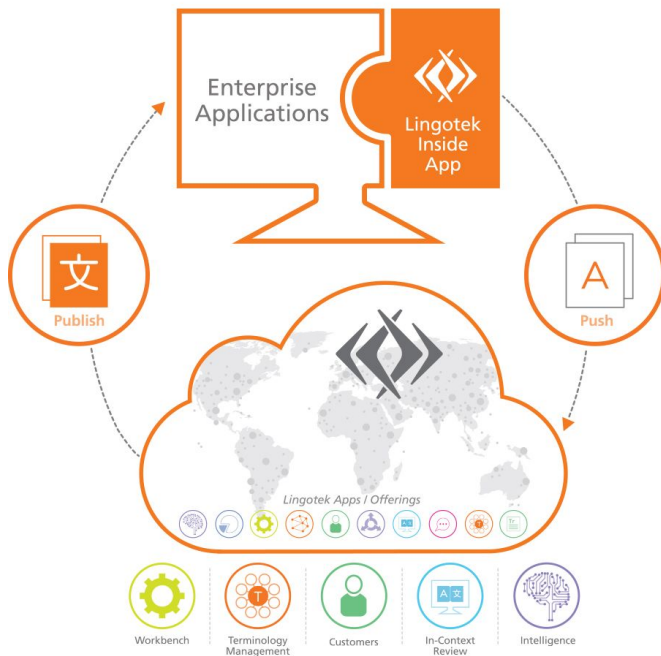

Users can request translation from any page, and when the translation is complete, it is automatically merged back into the application. The connector will even automatically detect changes and send any new content for translation, so your information is always accurate and up to date.

Use Cases

- Customer Engagement
- Customer Relationship Management (CRM)
- Content Management Systems (CMS)
- Desktop Files
- Desktop Publishing
- Digital Asset Management (DAM)
- eCommerce
- Knowledge Bases
- Marketing Automation
- Software
- Version Control (VCS)
- Website Platforms

Lingotek Has **More** Connectors!

Adobe Indesign

- Lingotek one2edit connector lets teams collaboratively edit, translate, and review in-context to ensure proper formatting.

Adobe Experience Manager (AEM)

- Adobe-certified for AEM 6.1–6.3. Automates translation of sites, community forums, commerce products, etc.

Atlassian Confluence

- Support for Confluence Cloud and Server 6.0+ for multilingual project collaboration, articles, and documentation.

Box

- Secure localization of content to view, share, and comment on in the users native language.

Google Drive

- Translate documents stored on Google drive.

Dropbox

- Localize your secure shared files of more than 30+ file types.

Drupal

- D7 & D8 modules translate entities, taxonomy terms, config items, properties, and built-in interface strings. Used on Acquia's own website. Earned Drupal security shield designation.

Eloqua Oracle Marketing Cloud

- Lingotek + iTalent connector translates campaign assets: emails, landing pages, and forms.

File Systems

- A powerful utility for translation of desktop, server, network, and cloud files. Supports 20+ file types.

Git

- Software and website localization to simplify creating and maintaining software applications inside Git.

GlotPress

- Translate WordPress interface from this code repository. Not for user-created content.

HubSpot

- Translation of multilingual marketing assets such as emails, blogs, website pages, and forms.

Liferay

- Developed with Xtivia for translating content, collaboration, and social sites.

Lingoport

- Integrates with Globalyzer Suite for software localization to streamline dev, localization, and management.

Lithium

- Translation for community forums, discussion boards, knowledge bases, and social media feedback.

Mac OS

- Localize files stored on your Mac.

Magento

- Translation of retail, ecommerce sites for multilingual product descriptions, SEO meta tags, etc.

Marketo

- Translation of your marketing campaigns. Including email templates, emails, forms, landing pages, snippets, and dynamic content.

MindTouch

- Translation of FAQs, articles, documents, user manuals, support, and training materials. Translate MindTouch in 32+ languages at no additional cost.

OneDrive

- Localize 30+ file types stored in your OneDrive.

Oracle WebCenter

- The Oracle WebCenter suite is divided into three products - Sites, Portal, and Content. We have connectors for all three.

Salesforce

- For multilingual Knowledge Base Articles, Leads, Cases, and Case Comments. Users can select which the language to view the information in.

Sitecore

- Multilingual CMS for large enterprises and multichannel marketing automation software.

Sharepoint Site Libraries

- Translate document libraries, files, forms, and templates.

Software UI

- Add localization to your development workflow by connecting Lingotek directly to your code repository.

Windows 7 - 10

- Supports translation of files stored on your PC.

WordPress

- 100% compatibility with Polylang. Top ranked plugin for multilingual. Request professional translation with one click.

Zendesk

- Translate Zendesk knowledge base articles, sections, and category labels.

Lingotek Filesystem Connector

The Lingotek Filesystem Connector makes requesting and managing translation easier than ever. This powerful utility makes it possible to quickly add content, request translations, and view completed translations right from your desktop or server.

Once you've created your project in the Lingotek TMS, you can easily manage your translations right from your desktop or server by simply dragging and dropping or copying any file you need translated. When the translations are complete, they will automatically be sent to your desktop or server folder.

The Lingotek Filesystem Connector replaces the old, time-consuming, offline translation process and replaces it with cloud-based networked translation that is faster and more secure.

FILE TYPES SUPPORTED:

- APPLE_STRINGS .string
- CSV .csv
- DITAMAP .ditamap
- DOCX_OKAPI .docx
- DOXYGEN .cpp .c .dox .h
- DTD .dtd
- EXCEL_OKAPI .xlsx
- HTML5_ITS
- HTML_OKAPI .html .htm
- IDML .idml
- JAVA_PROPERTIES_OKAPI .properties
- JSON .json
- KV_PAIR

- XLIFF2_OKAPI
- XLIFF_OKAPI
.xliff .xlf
- XLSX_OKAPI
- XML_OKAPI
.xml

Custom Integration? Visit the Lingotek DevZone

The Lingotek DevZone provides you with all the necessary tools to leverage our open, multilingual API to translate content in any type of web-enabled application. It is an easy-to-use, powerful way to integrate your enterprise applications with the Lingotek TMS.

The Lingotek multilingual API 5.0 includes significant enhancements and simplification, enabling developers to integrate with Lingotek more quickly and efficiently. This version of the API is resource-based (i.e., RESTful) and offers interaction with resources such as document, project, and community.

Gaining access and authenticating to the Lingotek API is easy. Simply register and we will send you an access token to begin integrating with our sandbox environment. To help you get started as quickly as possible, we've provided code examples showing you how roundtrip a document in API 5. We also provide documentation with business requirements and specific API details to support fully featured integrations.

Visit the DevZone and build something amazing!
