

Language Service:

Functional Testing

What we offer

Functional testing to ensure error-free execution.

Lingotek Language Services engineers provide rigorous functional testing to verify that the localization process has not compromised the functionality of your localized content, software, or site.

Extensive testing

- Testing of all Content, Software & Website
- Trained multilingual testers
- Localized content reimported into your application
- Navigation of the entire user interface
- Look for coding errors
- Check for formatting errors:
 - Garbage characters
 - Text that has been cut off
 - Sizing issues
 - Graphics display
 - Formatting errors
 - Untranslated text

Thorough results reporting

The results of Lingotek's functional testing are all logged and reported to ensure error-free execution of your content localization.

In-context workbench

- Translation, formatting, and review all in one workbench.
- Launch the ICW from any web page with a Google Chrome extension.
- Get an interactive, real-time view of translation in context.
- View the quality and layout of the translation.
- See segmented views, side by side, in the same window.
- View in full-screen mode with a single click.
- Revision history for quick and easy navigation to unapproved or edited segments.
- Highlighted glossary terms throughout the entire document provide a visual cue for users.
- Apply formatting and adjust layouts of text.
- Insert new inline tags in the target text (
, and new line) to adjust the layout of the translated text.
- Preview translations in context before you publish.

Benefits

- Guarantee consistent look & feel.
- Identify any localization issues prior to launch.
- Ensure a positive, personalized user experience.
- Protect your brand from embarrassing mistakes.
