

The power to translate is now inside **Git!**

Lingotek enables the creation and management of multilingual content inside Git.

The Lingotek solution leverages People, Process and Technology. We have unparalleled expertise in web content, documentation, and software localization. We employ a proven translation and localization process. This, combined with our cloud-based translation management system, empowers enterprises to engage customers globally.

Lingotek offers cloud-based software and website localization solutions that simplify the process of creating and maintaining your software applications inside Git. Our Lingotek - Inside Git integration features solutions that ease the manual burden of launching in new markets while improving language consistency, cutting costs, and enabling you to deliver your brand to consumers abroad in the quickest and most effective way possible.

- » Cost Savings
- » Faster Translation Times
- » Higher Quality
- » Real-time Monitoring
- » Eliminate the Copy/Paste Method of Translating
- » Increased Involvement and Loyalty
